Total net assets	\$403 million
Average market cap ⁵	\$270 billion
Standard deviation ⁶	17.60
Turnover rate (%) ⁸	2

Portfolio management/industry experience

Brent Reeder	29 years
Subadvised by NTI	–

Objective

The fund seeks to provide investment results that, before expenses, correspond to the total return of common stocks publicly traded in the United States, as represented by the Standard & Poor's 500 Composite Stock Price Index (S&P 500® Index).¹ The fund invests for capital appreciation, not income; any dividend and interest income is incidental to the pursuit of its objective.

Strategy

The fund seeks to replicate, before expenses, the risk and return characteristics of the S&P 500 Index¹, through investments in common stocks of companies that make up the Index, in approximately the same weightings as the index. The fund's portfolio management team uses quantitative analysis techniques to structure the fund to obtain a high correlation to the S&P 500 Index.

Expense ratio (as of latest prospectus)

Class	Net	Gross	Contractual Waiver
S	0.25%	0.36%	04/30/2025
INST	0.20%	0.30%	04/30/2025
R6	0.20%	0.24%	04/30/2025

Without a waiver, returns would have been lower and any rankings/ratings might have been less favorable.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

³ Average market capitalization measures the size of the companies in which the fund invests. Standard deviation is a three-year statistical measure of the volatility of a fund's returns. Generally, the greater the standard deviation, the greater the fund's volatility. Turnover rate is the rate of trading activity in a fund's portfolio of investments, equal to the lesser of purchases or sales, for a year, divided by average total assets for that year. ⁸Source: Morningstar, Inc. as of 02/29/2024.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Fund risk: Stocks may decline in value. Various factors, including costs, cash flows and security selection, may cause the fund's performance to differ from that of the index. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. The fund may lend securities to approved institutions. Please read the prospectus for details.

Consider the investment objective, risks, charges and expenses carefully before investing. For a summary prospectus, or prospectus that contains this and other information, download one from www.dws.com or talk to your financial representative. Read the prospectus carefully before investing.
