

SUPPLEMENT TO THE CURRENTLY EFFECTIVE SUMMARY PROSPECTUS

DWS ESG Core Equity Fund

Due to the upcoming retirement of Arno V. Puskar, Portfolio Manager of the fund, the following information replaces the existing disclosure contained under the "Portfolio Manager(s)" sub-heading under the "MANAGEMENT" heading of the fund's summary prospectus.

Pankaj Bhatnagar, PhD, Head of Investment Strategy Equity. Portfolio Manager of the fund. Began managing the fund in 2019.

Arno V. Puskar, Senior Portfolio Manager Equity. Portfolio Manager of the fund through May 15, 2024. Began managing the fund in 2019.

Hiten Shah, Portfolio Manager Equity. Portfolio Manager of the fund. Began managing the fund in 2020.

Please Retain This Supplement for Future Reference

Summary Prospectus | March 1, 2024

DWS ESG Core Equity Fund

Class/Ticker **A** DESAX **C** DESCX **R** DESRX **R6** DESUX **INST** DESGX **S** DESSX

Before you invest, you may want to review the fund's prospectus, which contains more information about the fund and its risks. You can find the fund's prospectus, reports to shareholders, Statement of Additional Information (SAI) and other information about the fund online at dws.com/mutualpros. You can also get this information at no cost by e-mailing a request to service@dws.com, calling (800) 728-3337 or asking your financial representative. The Prospectus and SAI, both dated March 1, 2024, as may be revised or supplemented from time to time, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The fund seeks long-term growth of capital, current income and growth of income.

FEES AND EXPENSES

These are the fees and expenses you may pay when you buy, hold and sell shares. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales charge discounts in Class A shares if you and your immediate family invest, or agree to invest in the future, at least \$50,000 in DWS funds. More information about these and other discounts and waivers is available from your financial representative and in Choosing a Share Class in the prospectus (p. 16), Sales Charge Waivers and Discounts Available Through Intermediaries in the prospectus (Appendix B, p. 46) and Purchase and Redemption of Shares in the fund's SAI (p. II-15).

SHAREHOLDER FEES (paid directly from your investment)

	A	C	R	R6	INST	S
Maximum sales charge (load) imposed on purchases, as % of offering price	5.75	None	None	None	None	None
Maximum deferred sales charge (load), as % of redemption proceeds ¹	None	1.00	None	None	None	None
Account Maintenance Fee (annually, for fund account balances below \$10,000 and subject to certain exceptions)	\$20	\$20	None	None	None	\$20

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a % of the value of your investment)

	A	C	R	R6	INST	S
Management fee	0.47	0.47	0.47	0.47	0.47	0.47
Distribution/service (12b-1) fees	0.24	0.99	0.50	None	None	None
Other expenses	0.26	0.32	0.38	0.15	0.21	0.25
Total annual fund operating expenses	0.97	1.78	1.35	0.62	0.68	0.72
Fee waiver/expense reimbursement	0.17	0.23	0.30	0.07	0.13	0.17
Total annual fund operating expenses after fee waiver/expense reimbursement	0.80	1.55	1.05	0.55	0.55	0.55

¹ Investments of \$1,000,000 or more may be eligible to buy Class A shares without a sales charge (load), but may be subject to a contingent deferred sales charge of 1.00% if redeemed within 12 months of the original purchase date and 0.50% if redeemed within the following six months.

The Advisor has contractually agreed through February 28, 2025 to waive its fees and/or reimburse fund expenses to the extent necessary to maintain the fund's total annual operating expenses (excluding certain expenses such as extraordinary expenses, taxes, brokerage, interest expense and acquired fund fees and expenses) at ratios no higher than 0.80%, 1.55%, 1.05%, 0.55%, 0.55% and 0.55%, for Class A, Class C, Class R, Class R6, Institutional Class and Class S, respectively. The agreement may only be terminated with the consent of the fund's Board.

EXAMPLE

This Example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses (including one year of capped expenses in each period) remain the same. Class C shares generally convert automatically to Class A shares after 8 years. The information

presented in the Example for Class C reflects the conversion of Class C shares to Class A shares after 8 years. See “Class C Shares” in the “Choosing a Share Class” section of the prospectus for more information. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Years	A	C	R	R6	INST	S
1	\$ 652	\$ 258	\$ 107	\$ 56	\$ 56	\$ 56
3	850	538	398	191	204	213
5	1,065	943	711	339	366	384
10	1,682	1,862	1,598	768	834	878

You would pay the following expenses if you did not redeem your shares:

Years	A	C	R	R6	INST	S
1	\$ 652	\$ 158	\$ 107	\$ 56	\$ 56	\$ 56
3	850	538	398	191	204	213
5	1,065	943	711	339	366	384
10	1,682	1,862	1,598	768	834	878

PORTFOLIO TURNOVER

The fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may mean higher taxes if you are investing in a taxable account. These costs are not reflected in annual fund operating expenses or in the expense example, and can affect the fund’s performance. During the most recent fiscal year, the fund’s portfolio turnover rate was 11% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Main investments. Under normal circumstances, the fund invests at least 80% of net assets, plus the amount of any borrowings for investment purposes, in equities, mainly common stocks, which meet the Advisor’s sustainability criteria at the time of investment. The fund may, at the discretion of portfolio management, invest up to 20% of net assets in investments that do not meet such sustainability criteria. Although the fund can invest in companies of any size and from any country, it invests primarily in large US companies. Portfolio management may favor securities from different industries and companies at different times.

Management process. In choosing stocks, portfolio management uses a proprietary environmental, social and governance (ESG) assessment in addition to proprietary quantitative models to identify and acquire holdings for the fund.

The ESG assessment used by the Advisor to meet the Advisor’s sustainability criteria is DWS’s ESG Quality Assessment. This assessment is conducted using a DWS

proprietary ESG tool that evaluates an issuer’s performance across a variety of ESG indicators, primarily on the basis of data obtained from multiple third-party ESG data vendors and public sources, and assigns a DWS ESG Quality Grade to each issuer. An additional DWS internal review process allows for changes to the DWS ESG Quality Grade. An internal review may occur, for example, if it is deemed that information is not reflected in the existing ESG grade because new information or insights have emerged that the ESG data vendors have not yet processed. Examples of information that may be considered in this review process include, but are not limited to, the announcement of new (or withdrawal from previously announced) climate-related commitments, or the resolution of legacy (or involvement in new) controversies. Portfolio management may use its discretion in considering application of internal reviews on a given grade.

The DWS ESG Quality Assessment seeks to identify ESG leaders and laggards within industry- and region-specific peer groups in terms of overall ESG performance (best-in-class approach). Issuers within the same industry- and region-specific peer group are graded on a scale of A (true leader) to F (true laggard). Issuers with a grade of C or above are deemed to meet the Advisor’s sustainability criteria. In calculating the DWS ESG Quality Grade, the DWS proprietary ESG tool utilizes a proprietary methodology to evaluate ESG scores from multiple third-party data vendors across a broad range of ESG indicators to arrive at a consensus overall quality grade intended to reflect which companies may be positioned better to address, and which companies may be more exposed to future ESG risks, relative to their peers. The broad range of ESG indicators measured include, among others, assessments of an issuer’s carbon emissions including its own emissions and those of its products and services, land use and biodiversity, climate change strategy and vulnerability, product safety and quality, employee management issues including equal opportunities and non-discrimination, freedom of association and right to collective bargaining and occupational health and safety, community relations, human rights issues related to supply chain, business ethics and anti-corruption, and corporate governance matters including executive pay, board diversity and board independence.

The quantitative models utilized by portfolio management are research based and identify primarily fundamental factors, including valuation, momentum, profitability, earnings and sales growth, which have been effective sources of return historically. These are dynamic models with different factor weights for different industry groupings. The fund’s portfolio is constructed based on this quantitative process that strives to maximize returns while maintaining a risk profile similar to the fund’s benchmark index. All investment decisions are made within risk parameters set by portfolio management. The factors considered and models used by portfolio management may be

adjusted from time to time and may favor different types of securities from different industries and companies at different times.

At the time of the portfolio's scheduled rebalancing, a security may be sold when a quantitative model indicates that other investments are more attractive, when the company no longer meets performance or risk expectations, to maintain portfolio characteristics similar to the fund's benchmark, or if its DWS ESG Quality Grade falls below a minimum threshold.

Securities lending. The fund may lend securities (up to one-third of total assets) to approved institutions, such as registered broker-dealers, pooled investment vehicles, banks and other financial institutions. In connection with such loans, the fund receives liquid collateral in an amount that is based on the type and value of the securities being lent, with riskier securities generally requiring higher levels of collateral.

Derivatives. The fund may invest in derivatives, which are financial instruments whose performance is derived, at least in part, from the performance of an underlying asset, security or index. From time to time, certain amounts of the fund's assets will be invested in total return swap transactions, through which the fund and a swap counterparty will exchange the returns of a custom basket of both long and short positions selected using portfolio management's proprietary quantitative models. Portfolio management may use total return swaps in seeking to enhance potential returns as well as for hedging. In addition, portfolio management may use options and futures contracts as a substitute for direct investment in a particular asset class or to keep cash on hand to meet shareholder redemptions. Portfolio management may also use put options for hedging and volatility management purposes.

The fund may also use other types of derivatives (i) for hedging purposes; (ii) for risk management; (iii) for non-hedging purposes to seek to enhance potential gains; or (iv) as a substitute for direct investment in a particular asset class or to keep cash on hand to meet shareholder redemptions. Derivatives used by the fund do not receive a DWS ESG Quality Grade.

MAIN RISKS

There are several risk factors that could hurt the fund's performance, cause you to lose money or cause the fund's performance to trail that of other investments. The fund may not achieve its investment objective, and is not intended to be a complete investment program. An investment in the fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Stock market risk. When stock prices fall, you should expect the value of your investment to fall as well. Stock prices can be hurt by poor management on the part of the stock's issuer, shrinking product demand and other business risks. These may affect single companies as well as

groups of companies. The market as a whole may not favor the types of investments the fund makes, which could adversely affect a stock's price, regardless of how well the company performs, or the fund's ability to sell a stock at an attractive price. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. Events in the US and global financial markets, including actions taken by the US Federal Reserve or foreign central banks to stimulate or stabilize economic growth, may at times result in unusually high market volatility which could negatively affect performance. High market volatility may also result from significant shifts in momentum of one or more specific stocks due to unusual increases or decreases in trading activity. Momentum can change quickly, and securities subject to shifts in momentum may be more volatile than the market as a whole and returns on such securities may drop precipitously. To the extent that the fund invests in a particular geographic region, capitalization or sector, the fund's performance may be affected by the general performance of that region, capitalization or sector.

Market disruption risk. Economies and financial markets throughout the world have become increasingly interconnected, which has increased the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. This includes reliance on global supply chains that are susceptible to disruptions resulting from, among other things, war and other armed conflicts, extreme weather events, and natural disasters. Such supply chain disruptions can lead to, and have led to, economic and market disruptions that have far-reaching effects on financial markets worldwide. The value of the fund's investments may be negatively affected by adverse changes in overall economic or market conditions, such as the level of economic activity and productivity, unemployment and labor force participation rates, inflation or deflation (and expectations for inflation or deflation), interest rates, demand and supply for particular products or resources including labor, and debt levels and credit ratings, among other factors. Such adverse conditions may contribute to an overall economic contraction across entire economies or markets, which may negatively impact the profitability of issuers operating in those economies or markets. In addition, geopolitical and other globally interconnected occurrences, including war, terrorism, economic or financial crises, uncertainty or contagion, trade disputes, government debt crises (including defaults or downgrades) or uncertainty about government debt payments, government shutdowns, public health crises, natural disasters, supply chain disruptions, climate change and related events or conditions have led, and in the future may lead, to disruptions in the US and world economies and markets, which may increase financial market volatility and have significant adverse direct or indirect effects on the fund and its investments. Adverse market conditions or disruptions could cause the fund to lose money, experience significant redemptions, and encounter operational

difficulties. Although multiple asset classes may be affected by adverse market conditions or a particular market disruption, the duration and effects may not be the same for all types of assets.

Current military and other armed conflicts in various geographic regions, including those in Europe and the Middle East, can lead to, and have led to, economic and market disruptions, which may not be limited to the geographic region in which the conflict is occurring. Such conflicts can also result, and have resulted in some cases, in sanctions being levied by the United States, the European Union and/or other countries against countries or other actors involved in the conflict. In addition, such conflicts and related sanctions can adversely affect regional and global energy, commodities, financial and other markets and thus could affect the value of the fund's investments. The extent and duration of any military conflict, related sanctions and resulting economic and market disruptions are impossible to predict, but could be substantial.

Other market disruption events include pandemic spread of viruses, such as the novel coronavirus known as COVID-19, which have caused significant uncertainty, market volatility, decreased economic and other activity, increased government activity, including economic stimulus measures, and supply chain disruptions. While COVID-19 is no longer considered to be a public health emergency, the fund and its investments may be adversely affected by lingering effects of this virus or future pandemic spread of viruses.

In addition, markets are becoming increasingly susceptible to disruption events resulting from the use of new and emerging technologies to engage in cyber-attacks or to take over the websites and/or social media accounts of companies, governmental entities or public officials, or to otherwise pose as or impersonate such, which then may be used to disseminate false or misleading information that can cause volatility in financial markets or for the stock of a particular company, group of companies, industry or other class of assets.

Adverse market conditions or particular market disruptions, such as those discussed above, may magnify the impact of each of the other risks described in this "MAIN RISKS" section and may increase volatility in one or more markets in which the fund invests leading to the potential for greater losses for the fund.

Security selection risk. The securities in the fund's portfolio may decline in value. Portfolio management could be wrong in its analysis of industries, companies, economic trends, the relative attractiveness of different securities or other matters.

ESG investing risk. Investing primarily in investments that meet ESG criteria carries the risk that the fund may forgo otherwise attractive investment opportunities or increase or decrease its exposure to certain types of issuers and,

therefore, may underperform funds that do not consider ESG factors. The ESG research and assessments used by the Advisor are based on information that is publicly available and/or provided by the companies themselves or by third parties. Such information may be unavailable or unreliable or out of date and, with respect to information provided by third parties, may be based on criteria that differ among data providers. The reliability and comparability of the data will affect the Advisor's ESG assessments. The DWS ESG Quality Grade is intended to represent a consensus view of the overall ESG performance of an issuer and therefore a high DWS ESG Quality Grade or inclusion in the fund is not an indication that an issuer exhibits positive ESG performance on any particular ESG-related issue. The DWS ESG Quality Grade for an issuer may not accurately reflect the issuer's ESG performance. The DWS ESG Quality Grade is based on peer group comparisons, which may result in a favorable grade for an issuer that might not have received a favorable rating if compared to a broader universe of issuers. Additionally, investors can differ in their views of what constitutes positive or negative ESG characteristics. As a result, the fund may invest in issuers that do not reflect the beliefs and values with respect to ESG of any particular investor.

Quantitative model risk. The fund's strategy relies heavily on quantitative models and the analysis of specific metrics to construct the fund's portfolio. The impact of these metrics on a stock's performance can be difficult to predict, and stocks that previously possessed certain desirable quantitative characteristics may not continue to demonstrate those same characteristics in the future. In addition, relying on quantitative models entails the risk that the models themselves may be limited or incorrect, that the data on which the models rely may be incorrect or incomplete, and that the Advisor may not be successful in selecting companies for investment or determining the weighting of particular stocks in the fund's portfolio. Any of these factors could cause the fund to underperform funds with similar strategies that do not select stocks based on quantitative analysis.

Focus risk. To the extent that the fund focuses its investments in particular industries, asset classes or sectors of the economy, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the fund's performance. The fund may become more focused in particular industries, asset classes or sectors of the economy as a result of changes in the valuation of the fund's investments or fluctuations in the fund's assets, and the fund is not required to reduce such exposures under these circumstances.

Liquidity risk. In certain situations, it may be difficult or impossible to sell an investment and/or the fund may sell certain investments at a price or time that is not advantageous in order to meet redemption requests or other

cash needs. Unusual market conditions, such as an unusually high volume of redemptions or other similar conditions could increase liquidity risk for the fund.

Pricing risk. If market conditions make it difficult to value some investments, the fund may value these investments using more subjective methods, such as fair value pricing. In such cases, the value determined for an investment could be different from the value realized upon such investment's sale. As a result, you could pay more than the market value when buying fund shares or receive less than the market value when selling fund shares.

Securities lending risk. Securities lending involves the risk that the fund may lose money because the borrower of the loaned securities fails to return the securities in a timely manner or at all. A delay in the recovery of loaned securities could interfere with the fund's ability to vote proxies or settle transactions. Delayed settlement may limit the ability of the fund to reinvest the proceeds of a sale of securities or prevent the fund from selling securities at times and prices it considers desirable. The fund could also lose money in the event of a decline in the value of the collateral provided for the loaned securities, or a decline in the value of any investments made with cash collateral or even a loss of rights in the collateral should the borrower of the securities fail financially while holding the securities.

Derivatives risk. Derivatives involve risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Risks associated with derivatives may include the risk that the derivative is not well correlated with the underlying asset, security or index to which it relates; the risk that derivatives may result in losses or missed opportunities; the risk that the fund will be unable to sell the derivative because of an illiquid secondary market; the risk that a counterparty is unwilling or unable to meet its obligation, which risk may be heightened in derivative transactions entered into "over-the-counter" (i.e., not on an exchange or contract market); and the risk that the derivative transaction could expose the fund to the effects of leverage, which could increase the fund's exposure to the market and magnify potential losses.

Total return swaps used by the fund will be subject to the same derivatives risks described above. Because the total return swaps will be based on a custom basket of securities and other instruments, the total return swaps will be subject to the risks of those securities and other instruments that comprise the basket. The fund can lose money on a total return swap if the net value of the long and short positions selected by portfolio management decreases. Total return swaps may also be subject to risks arising from margin requirements and risks from mispricing or valuation complexity as well as operational and legal risks. If the fund has insufficient cash to meet daily margin or payment requirements, it may have to sell securities from its portfolio at a time when it is disadvantageous to do

so. A total return swap may effectively add leverage to the fund's portfolio because, in addition to its total net assets, the fund would be subject to investment exposure on the notional amount of the swap.

Counterparty risk. A financial institution or other counterparty with whom the fund does business, or that underwrites, distributes or guarantees any investments or contracts that the fund owns or is otherwise exposed to, may decline in financial health and become unable to honor its commitments. This could cause losses for the fund or could delay the return or delivery of collateral or other assets to the fund.

Operational and technology risk. Cyber-attacks, disruptions or failures that affect the fund's service providers or counterparties, issuers of securities held by the fund, or other market participants may adversely affect the fund and its shareholders, including by causing losses for the fund or impairing fund operations. For example, the fund's or its service providers' assets or sensitive or confidential information may be misappropriated, data may be corrupted and operations may be disrupted (e.g., cyber-attacks, operational failures or broader disruptions may cause the release of private shareholder information or confidential fund information, interfere with the processing of shareholder transactions, impact the ability to calculate the fund's net asset value and impede trading). Market events and disruptions also may trigger a volume of transactions that overloads current information technology and communication systems and processes, impacting the ability to conduct the fund's operations.

While the fund and its service providers may establish business continuity and other plans and processes that seek to address the possibility of and fallout from cyber-attacks, disruptions or failures, there are inherent limitations in such plans and systems, including that they do not apply to third parties, such as fund counterparties, issuers of securities held by the fund or other market participants, as well as the possibility that certain risks have not been identified or that unknown threats may emerge in the future and there is no assurance that such plans and processes will be effective. Among other situations, disruptions (for example, pandemics or health crises) that cause prolonged periods of remote work or significant employee absences at the fund's service providers could impact the ability to conduct the fund's operations. In addition, the fund cannot directly control any cybersecurity plans and systems put in place by its service providers, fund counterparties, issuers of securities held by the fund or other market participants.

PAST PERFORMANCE

How a fund's returns vary from year to year can give an idea of its risk; so can comparing fund performance to overall market performance (as measured by an appropriate market index). Past performance may not indicate future results. All performance figures below assume that

dividends and distributions were reinvested. For more recent performance figures, go to dws.com (the Web site does not form a part of this prospectus) or call the telephone number included in this prospectus.

Prior to September 23, 2019, the fund operated with a different investment strategy. Prior to September 3, 2013, the fund had a sub-advisor and a different investment management team that operated with a different investment strategy. Performance would have been different if the fund's current investment strategy had been in effect.

CALENDAR YEAR TOTAL RETURNS (%) (Class A)

These year-by-year returns do not include sales charges, if any, and would be lower if they did. Returns for other classes were different and are not shown here.

	Returns	Period ending
Best Quarter	18.84%	June 30, 2020
Worst Quarter	-19.92%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURNS

(For periods ended 12/31/2023 expressed as a %)

After-tax returns (which are shown only for Class A and would be different for other classes) reflect the historical highest individual federal income tax rates, but do not reflect any state or local taxes. Your actual after-tax returns may be different. After-tax returns are not relevant to shares held in an IRA, 401(k) or other tax-advantaged investment plan.

	Class Inception	1 Year	5 Years	10 Years

MANAGEMENT

Investment Advisor

DWS Investment Management Americas, Inc.

Portfolio Manager(s)

Pankaj Bhatnagar, PhD, Head of Investment Strategy Equity. Portfolio Manager of the fund. Began managing the fund in 2019.

Arno V. Puskar, Senior Portfolio Manager Equity. Portfolio Manager of the fund. Began managing the fund in 2019.

Hiten Shah, Portfolio Manager Equity. Portfolio Manager of the fund. Began managing the fund in 2020.

PURCHASE AND SALE OF FUND SHARES

MINIMUM INITIAL INVESTMENT (\$)

	Non-IRA	IRAs	UGMAs/ UTMAs	Automatic Investment Plans
A, C	1,000	500	1,000	500
R	None	N/A	N/A	N/A
R6	None	N/A	N/A	N/A
INST	1,000,000	N/A	N/A	N/A
S	2,500	1,000	1,000	1,000

For participants in all group retirement plans, and in certain fee-based and wrap programs approved by the Advisor, there is no minimum initial investment and no minimum additional investment for Class A, C and S shares. For Section 529 college savings plans, there is no minimum initial investment and no minimum additional investment for Class S shares and Class R6 shares. The minimum initial investment for Class S shares may be waived for eligible intermediaries that have agreements with DDI to offer Class S shares in their brokerage platforms when such Class S shares are held in omnibus accounts on such brokerage platforms. In certain instances, the minimum initial investment may be waived for Institutional Class shares. For more information regarding available Institutional Class investment minimum waivers, see "Institutional Class Shares – Investment Minimum" in the "Choosing a Share Class" section of the prospectus. There is no minimum additional investment for Institutional Class, Class R and Class R6 shares. The minimum additional investment in all other instances is \$50.

TO PLACE ORDERS

Mail	All Requests	DWS PO Box 219151 Kansas City, MO 64121-9151
Expedited Mail		DWS 430 West 7th Street Suite 219151 Kansas City, MO 64105-1407
Web Site		dws.com
Telephone		(800) 728-3337, M – F 8 a.m. – 7 p.m. ET
Hearing Impaired		For hearing impaired assistance, please call us using a relay service

by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's Web site for more information.

The fund is generally open on days when the New York Stock Exchange is open for regular trading. If you invest with the fund directly through the transfer agent, you can open a new fund account (Class S shares only) and make an initial investment on the Internet at dws.com, by using the mobile app or by mail. You can make additional investments or sell shares of the fund on any business day by visiting the fund's Web site, by using the mobile app, by mail, or by telephone; however you may have to elect certain privileges on your initial account application. The ability to open new fund accounts and to transact online or using the mobile app varies depending on share class and account type. If you are working with a financial representative, contact your financial representative for assistance with buying or selling fund shares. A financial representative separately may impose its own policies and procedures for buying and selling fund shares.

Class R shares are generally available only to certain retirement plans, which may have their own policies or instructions for buying and selling fund shares. Class R6 shares are generally available only to certain qualifying plans and programs, which may have their own policies or instructions for buying and selling fund shares. Institutional Class shares are generally available only to qualified institutions. Class S shares are available through certain intermediary relationships with financial services firms, or can be purchased by establishing an account directly with the fund's transfer agent.

TAX INFORMATION

The fund's distributions are generally taxable to you as ordinary income or capital gains, except when your investment is in an IRA, 401(k), or other tax-advantaged investment plan. Any withdrawals you make from such tax-advantaged investment plans, however, may be taxable to you.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund, the Advisor, and/or the Advisor's affiliates may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest
